

Hey guys, for the last 15-20 years I've been selling earphones anywhere from hundred to \$2000 a set. Often the earphones come with a small soft shell case or a hard shell case that barely fits the earphones. As of late I've seen nice hard shell case that's too tight for the earphones! I've seen it all.

What we have here is a water proof hard shell case that is the perfect size for a set of earphones. You don't have to wind them up just correctly to fit them in the case. Wrap them around three fingers and you're set. The case is waterproof and padded nicely to protect your investment. It also comes with a moisture removal system. This will increase the life of your earphones by a lot. It will remove all the moisture from the sensitive components and will keep the earphones performing like the day you bought them.

You've spent a lot on your earphones. This is an inexpensive way to protect your investment.

As usual, questions feel free to give me a call.

The case is watertight, crushproof and has a clear automatic pressure purge valve. The case has a matching speed lock and a black foam lining to protect your earphones.

- Unbreakable, watertight, airtight, dustproof, chemical resistant and corrosion proof case
- Made of copolymer polycarbonate that makes it extremely strong and durable
- Speed lock
- Clear purge cap
- Temperature Rating -10 degrees to Plus 200 degrees

Material	Polycarbonate
Maximum Buoyancy	Floats in salt water with 8 oz (225 g) load
Type of Closure	Speed lock
Exterior Dimensions	5 7/16 x 4 1/16 x 2 1/8" (13.81 x 10.33 x 5.4cm)(LxWxD)

Top Inside: $4 \frac{7}{16} \times 2 \frac{15}{16} \times 1 \frac{11}{16}$ " (11.26 x 7.45 x 4.47cm) (LxWxD)
Bottom Inside: $4 \frac{3}{8} \times 2 \frac{7}{8}$ (11.11 x 7.3cm)(LxW)

Also included in this package is a moisture removal system for your earphones. The moisture removal system will help increase the life of your earphones by pulling the moisture from within the components. The drying crystal can be reactivated in a microwave oven. Directions included.
